Product Description

Reliable Width 1260mm/1400mm Membrane PVC Foil With Antibacterial Properties For Hospital Usage

Product Description:

Our PVC foil is made of Polyvinyl Chloride (PVC), a synthetic plastic with superior strength, flexibility, and easy processing. It is available in a variety of colors, patterns, and textures, providing a premium, affordable look that resembles real materials such as wood, stone, cloth, and metal. Moreover, it is suitable for a variety of surfaces, including walls, doors, cabinets, and furniture. What's more, this type of foil is renowned for its durability and resistance to wear and tear, so it is ideal for high-traffic areas. Plus, its maintenance process is easy and it just needs a weekly cleaning with a wet cloth. In addition to being economical, it comes in a wide range of styles and finishes, allowing to be modified according to individual project needs and preferences. Moreover, it is frequently used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other applications, both in homes and businesses.

Technical Parameters:

Our products come with a rich range of specifications. The thickness can range from 0.1mm to 0.5mm while the width can come in two varieties; 1260mm and 1400mm. The length of each roll is from 100m to 400m. We offer a wide array of designs for you to choose from, including wood grain, solid color, marble, brick and many others. The surface treatment options are matt, super matt, embossed, high gloss and soft touch. Last but not least, the services we provide are custom OEM and ODM.

Applications:

For different applications, there are various processes available with us:

Membrane Press (vacuum press) - This mainly covers MDF, particleboard, wooden board, fiberboard, etc, used for doors, kitchen cabinet, wardrobe and furniture items. Embossed board covers all five surfaces at the same time.

Wrapping Profiles - This covers all types of profiles, including wood, aluminum, and PVC used for door frames, window sills, base channels, and PVC ceilings.

Cold Laminating - Used for covering all types of flat panels, such as wood, steel, aluminium, and PVC panels used for doors and furniture.

Hot Laminating - Used for covering the PVC, steel, and aluminum panels for doors and skirting.

Self-adhesive - This can be used for any kind of smooth surface like furniture and indoor decoration.
