- Highlight: **stylish embossed pvc film,**
stylish pvc lamination film roll,
embossed pvc lamination film roll

Product Description

Product Description:

Our pvc foil is made of Polyvinyl Chloride (PVC), a synthetic plastic material renowned for its sturdiness, elasticity, and ease of processing. It is available in ample of colors, patterns, and textures. It can even copy the look of natural materials like wood, stone, fabric, or metal to provide an economical alternative to them, while still achieving the desired aesthetic.

It can be applied to various surfaces such as doors, cupboards, furniture, and walls. It bonds easily to almost any substrate and can be practically used everywhere indoors. Realsun Deco PVC foil is highly durable and can withstand wear and tear, making it perfect for high traffic areas. It only requires some gentle cleaning with a damp cloth, so it can be enjoyed maintenance free.

Another benefit of our pvc foil is its affordability compared to natural materials, enabling one to use upscale decorations without spending too much. Manufacturers offer plenty of finishes and styles for modification, suiting any project needs and personal design necessities.

Pvc decoration foil is regularly used in both commercial and residential settings such as kitchen and bathroom cabinets, interior doors, walls, furniture, retail displays, and more.

Technical Parameters:

Our company offers a wide range of products with thickness from 0.1mm to 0.5mm, along with width options from 1260mm to 1400mm and length ranging from 100m to 400m/roll. You can choose from a variety of designs, including Wood Grain, Solid Color, Marble, Brick, and more. We also offer surface treatments such as Matt, Super Matt, Embossed, High Gloss, and Soft Touch. Our product and service customization capabilities (including OEM and ODM service) give you the flexibility to get what you need in your desired specifications.

Applications:

For different applications, different processes are used.

Membrane Press (vacuum press) is used for covering MDF, particleboard, wooden board, fiber board, etc. for doors, kitchen cabinet, wardrobe or furniture. Thickness should be from 0.20-0.50mm, width 1260mm, 1400mm and length from 100-300m/roll. Cover embossed board, and cover five surfaces at same time.

Wrapping Profiles use thickness from 0.12-0.18mm, width from 40-1260mm and length from 300-800m/roll for wood profile, aluminum profile, PVC profile, etc. for door frame, window sill, base channel, PVC ceiling etc.

Cold Laminating is used for flat panels, such as wood panel, steel panel, aluminum panel and PVC panel, etc. for doors and furniture. Its thickness should be 0.12-0.20mm, width 1240-1260mm and length 300-500m/roll.

Hot Laminating is mainly used for PVC panel, steel panel and aluminum panel for doors and skirting, etc. Its thickness should be 0.16-0.30mm, width 1260mm and length 200-300m/roll.

When it comes to Self-adhesive, its thickness should be 0.10-0.20mm, width 600mm/1220mm and length 5-50m/roll. It can be attached to any kinds of smooth surface for furniture and indoor decorations.

Customization:

Realsun Deco provides the most comprehensive range of custom services for PVC Decorative Film. The product originates from Foshan, China, with a minimum order quantity of 3000m/model and a supply ability of 500000m/month. We offer competitive prices for a wide range of surface finishes, including glossy/matt/embossed/super matt/soft touch, as well as wood grain, marble, brick, stone and other designs. We guarantee that our products are non-toxic, anti-flame and moisture-proof. Our services include OEM, ODM and other custom services. We are the perfect partner for soft touch PVC foil, high gloss PVC film, PVC vacuum press film, PVC embossed film and other PVC decorative film.

Support and Services:

PVC Decorative Film technical support and service include:

24/7 customer service to answer inquiries regarding product specifications, pricing, ordering and delivery

In-house technical support team providing product installation and trouble-shooting assistance

On-site repair and maintenance services

Replacement parts and components available for purchase

Product warranty and extended service plans

Packing and Shipping:

PVC Decorative Film is packaged with foam sheet, kraft paper and plastic sheet to ensure protection from damage during shipping. The roll is then sealed with packing tape to protect the product from moisture and other environmental elements. The product is then shipped via air, sea, or land depending on the customer's needs.
