Product Description

Super Matte Surface Door Lamination PVC Film for Furniture Decoration

Product Description:

Material: Our PVC foil is made with Polyvinyl Chloride (PVC), a synthetic plastic that has great strength, flexibility, and is cost-effective to produce.

Appearance: Offering a wide variety of colors, patterns, and textures, our PVC foil can imitate the appearance of real materials such as wood, stone, cloth, or metal for a fraction of the price while still maintaining a premium feel.

Adaptability: Realsun Deco PVC foil is suitable for a range of surfaces such as walls, doors, cabinets, and furniture, and can be used in interior spaces for a variety of purposes.

Durability: Our PVC foil is renowned for its resistance to deterioration, making it perfect for high-traffic areas that require lasting performance.

Maintenance: It is easy to care for our PVC foil, it simply requires a quick wet-cloth wipe down once a week to maintain its shine.

Economical: Decorative PVC foil is a more cost-effective option than natural materials, allowing for the creation of high-end aesthetics for less.

Modification: There are a wealth of styles and finishes available to modify the foil and suit individual tastes and project requirements.

Application: Decorative PVC foil is most frequently used for wall paneling, furniture surfaces, retail displays, interior doors, cabinets, and more, in homes and commercial settings.

Features:

Product Name: PVC Furniture Film
