Product Description

Waterproof Furniture Laminating Film in PVC Material For Door Skin

Product Description:

Our **PVC Foil** is a synthetic plastic made of **Polyvinyl Chloride (PVC)** which is characterized by excellent strength, flexibility, and low processing costs. We provide a selection of colors, patterns, and textures, making it possible to mimic the appearance of natural materials such as wood, stone, metal or cloth but at a more cost-effective rate while still keeping a premium appearance.
Our product is well suited for surfaces such as walls, doors, cabinets, and furniture in various interior spaces. It is renowned for being resistant to wear and tear, making it an apt choice for areas with high traffic. To maintain the beauty of the foil, all it requires is weekly cleaning with a damp cloth.
Apart from its affordability, our PVC Foil is highly flexible and can be modified to meet your project requirements and personal design preferences. It is widely used in walls, furniture surfaces, retail displays, interior doors, and more, both in residential and commercial settings.

Technical Parameters:

If you're looking for superior quality and a large variety of vinyl sheet materials, then look no further. We offer vinyl sheets that come in a range of thicknesses, ranging from 0.1mm to 0.5mm. Our sheets also come in two different widths, 1260mm and 1400mm. The length of each roll varies, with some exceeding 100m and extending up to 400m.
Furthermore, we provide a diverse selection of vinyl sheet designs that come to life with a beautiful wood grain, solid color, marble, brick, or even a combination of these effects. We also offer a variety of surface treatments, such as matt, super matt, embossed, high gloss and soft touch. Our widest selection of designs is sure to cater to the needs of any customer.
We pride ourselves on our ability to customize and personalize products. We offer OEM and ODM services, and strive to meet the requests of every customer. Our vinyl sheets bring an extra level of quality and distinction to any project.

Applications:

Different Process for different applications:

Membrane Press (vacuum press) is commonly used to cover MDF, particleboard, wooden board, fiberboard, etc., for doors, kitchen cabinet, wardrobe, furniture, etc. It has a thickness of 0.20-0.50mm, width is 1260mm and 1400mm, and the length can be 100-300m/roll. What's more, this process can cover embossed board and five surfaces at the same time.
Wrapping Profiles has a thickness range from 0.12-0.18mm, width of 40-1260mm and length range from 300-800m/roll. It is applicable for all kinds of profiles including wood profile, aluminum profile, PVC profile, etc. for door frame, window sill, base channel, PVC ceiling and other purposes.
Cold Laminating generally has a thickness of 0.12-0.20mm, width of 1240-1260mm, and length range of 300-500m/roll. It is suitable for all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc. for doors and other furniture.
Hot Laminating usually has a thickness of 0.16-0.30mm, width of 1260mm, and length of 200-300m/roll. It is mainly used to cover the PVC panel, steel panel, aluminum panel for doors, skirting, and others.
Self-adhesive is a type of special product. The thickness is 0.10-0.20mm, the width has two values which are 600mm and 1220mm, and the length can be 5-50m/roll. Generally, it can be put on any smooth surface for furniture and indoor decorations.
