- Highlight: **PVC Furniture Film 0.1mm,
Wood Textured PVC Furniture Film**

Product Description

Product Description:

Our **PVC Foil** is made of a synthetic plastic called **Polyvinyl Chloride (PVC)**. It has excellent strength, flexibility, and processing simplicity.

We also offer a wide selection of **colors, patterns, and textures**. Moreover, our foil is able to imitate the look of natural materials like wood, stone, cloth, and metal while being more budget friendly.

This product is perfect for a variety of surfaces, such as walls, doors, furniture, and cabinets, even in high traffic areas. It is known for its longevity and requires minimal cleaning and maintenance.

Not to mention, **Decorative PVC Foil** is much lower cost than other natural materials, and is furthermore available in multiple styles and finishes to meet individual projects specifications.

It is a popular choice for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other home and commercial settings.

Features:

Product Name: PVC Furniture Film

Thickness: 0.1-0.5mm

Application: Furniture, Door, Cabinet, Wall, Profile, Ceiling Etc.

Surface: Glossy, Matte, Embossed, Super Matte, Soft Touchetc.

Packing: Roll Packing, Sheet Packing

MOQ: 3000m/model

Keywords: themofoil film for furniture, pvc laminate film for furniture, pvc film for furniture

Technical Parameters:

We offer PVC decorative film in a variety of thicknesses, from 0.1mm to 0.5mm. The widths of the films we offer are 1260mm and 1400mm, and the length of each roll is between 100m and 400m.

Additionally, we offer a range of designs, such as wood grain, solid color, marble, and brick. All of our PVC films have been surface treated to provide either a matt, super matt, embossed, high gloss, or soft touch finish.

The service we provide is both OEM, and ODM-based.

Applications:

Different Process for Different Application

Membrane Press (vacuum press): Thickness is between 0.20 and 0.50 mm, width ranges from 1260 mm to 1400 mm and length is usually between 100 and 300 m per roll. This process covers MDF, particleboard, wooden boards, fiberboard and other surfaces that are meant to be used for doors, kitchen cabinets, wardrobes, furniture and more. Cover embossed boards as well, again, up to five surfaces at the same time.

Wrapping Profiles: Thickness is between 0.12 and 0.18 mm, width can reach up to 1260 mm, while the length is between 300 and 800 m per roll. It covers all sorts of profiles, which include wood profile, aluminum profile and PVC profile. It is efficient for door frames, window sills, base channels, PVC ceilings and so forth.

Cold Laminating: Thickness is between 0.12 and 0.20 mm, width between 1240 and 1260 mm, and length between 300 and 500 m per roll. It works with all types of flat panels, such as wood panels, steel panels, aluminum panels, PVC panels and whatever other panels could be found, and is applicable for doors and furniture.

Hot Laminating: Thickness is between 0.16 and 0.30 mm, width is 1260 mm and length between 200 and 300 m per roll. It covers PVC panels, steel panels and aluminum panels and is recommended for doors, skirting and such.

Self-adhesive: Thickness between 0.10 and 0.20 mm, width 600 mm or 1220 mm and usually from 5 to 50 m per roll. It is for any kind of smooth surface, therefore it can be applied to furniture and indoor decorations.
