Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Service: OEM, ODM
- Width: 1260mm, 1400mm
- Usage: Lamination, Wrapping Machine, Vacuum Membrane Press
- Packing: Pack In Roll
- Application: Furniture/ Cabinet/ Door/ Wall/ Ceiling/ Profile, Etc.
- Thickness: 0.10mm-0.50mm
- MOQ: 3000m/model
- Feature: Non-toxic/ Anti-Flame/ Moisture-proof
- Highlight: **Moisture Proof PVC Decorative Film ,
1260mm PVC Decorative Film ,
Anti Flame PVC Decorative Film**

Moisture Proof PVC Decorative Film Rolls 1260mm / 1400mm Non Toxic Anti Flame Design

Product Description:

PVC Foil Product Overview

Material Composition

The core substance of our PVC film is **Polyvinyl Chloride (PVC)**, renowned for its superb durability, adaptability, and ease of manufacturing. As a synthetic polymer, it offers the sustaining qualities required for diverse applications.

Visual Appeal

Spanning a spectrum of hues, our PVC foil also comes in a medley of designs and finishes. It expertly mimics the aesthetics of natural textures like timber, mineral, fabric, and metallic surfaces while providing a cost-effective alternative with a luxurious look.

Versatility in Application

Optimized for application over a multitude of surfaces, the versatility of our foil transcends boundaries – from walls and doors to storage units and furnishings, it proves an ideal choice for various interior elements.

Enduring Quality

A product of Realsun Deco, the PVC foil stands as a testament to durability and resistance against wear. Especially recommended for areas that witness substantial use, its resilience ensures lasting service.

Minimal Upkeep

Once deployed, our PVC foil's care routine is uncomplicated. A simple wipe with a damp cloth weekly suffices to keep it looking pristine, making it a low-maintenance solution for modern living.

Cost Efficiency

With a lower price point than its natural counterparts, PVC decorative foil offers an economical pathway to achieving upscale designs without the hefty expense.

Customization Options

To meet the unique specifications of each project and cater to distinct style inclinations, manufacturers present an extensive array of patterns and finishes, thereby promoting customization.

Usage Scenarios

Our decorative PVC foil finds its place in a host of settings, including but not limited to wall overlays, furniture accents, retail visuals, door surfacing, as well as cabinetry in kitchens and baths. Its versatility makes it a staple in both residential and business environments.

Features:

Product Name: PVC Decorative Film

Usage: Lamination, Wrapping Machine, Vacuum Membrane Press

Material: PVC

Application: Furniture/ Cabinet/ Door/ Wall/ Ceiling/ Profile, Etc.

MOQ: 3000m/model

Width: 1260mm, 1400mm

Features: Soft Touch PVC Foil

Finish: PVC Wood Grain Foil

Applications:

Decorative Laminating Processes for Various Applications

Application 1: Membrane Press (Vacuum Press)

This process involves covering medium density fiberboard (MDF), particleboard, wooden board, and fiberboard surfaces. It is particularly suitable for manufacturing doors, kitchen cabinets, wardrobes, and other furniture items. The membrane press can cover embossed boards and simultaneously laminate five surfaces. The materials typically have a thickness ranging from 0.20 to 0.50 mm, a width of either 1260 mm or 1400 mm, and rolls extending from 100 to 300 meters.

Application 2: Wrapping Profiles

Using this method, a variety of profiles such as wood, aluminum, and PVC can be laminated. This includes applications for door frames, window sills, base channels, and PVC ceilings. Materials for wrapping profiles come with a thickness between 0.12 and 0.18 mm, width from 40 to 1260 mm, and roll lengths from 300 to 800 meters.

Application 3: Cold Laminating

Cold laminating caters to the coating of flat panels including those made of wood, steel, aluminum, and PVC, which are commonly used in doors and furniture. Materials used in this process generally have a thickness of 0.12 to 0.20 mm, a width between 1240 and 1260 mm, and roll lengths ranging from 300 to 500 meters.

Application 4: Hot Laminating

Hot laminating is applied onto PVC, steel, and aluminum panels which are often used for doors, skirtings, and similar elements. The materials for this process feature a thickness from 0.16 to 0.30 mm, a standard width of 1260 mm, and roll lengths between 200 and 300 meters.

Application 5: Self-adhesive

This self-adhesive material is versatile, capable of being applied to any smooth surface. It is widely used in furniture and indoor decoration applications. The thickness ranges from 0.10 to 0.20 mm, with widths of 600 mm or 1220 mm and roll lengths varying from 5 to 50 meters.

Customization:

Brand Name: Realsun Deco
Place of Origin: Foshan, China
Minimum Order Quantity: 3000m/model
Price: Negotiable
Packaging Details: Pack in roll
Delivery Time: 15-20 days
